

Testing Agile Projects

Dr Stuart Reid FBCS CITP, TSG
Thursday 17th February 2011 - 7:30pm

Location: Sophos plc, Abingdon OX14 3YP

Agile is quickly becoming the popular approach to software development, but it is implemented in a wide variety of ways and many 'agile' projects don't include testers in the agile team. This talk considers the variety of options used to integrate testing into agile projects, their respective advantages and disadvantages, and provides guidance on selecting the optimal set for your project.

Stuart Reid is Chief Technology Officer at Testing Solutions Group, London.

The event is free.

Members and non-members are very welcome.

Tea, coffee and sandwiches will be served from 7:00pm.

**Alcohol and light refreshments available
in the Spam and Lettuce restaurant bar after the talk.**

Stuart Reid
